

Hi, my name is Pranav Uppal. I have recently completed my Bachelors degree in computer applications ,specializing in web application development from North cap University with an 8.9 CGPA . Over the past few years, I have enhanced my technical skills through a range of academic projects, including creating responsive front-end designs, developing an AI-based chatbot, and automating appliances using IoT. Additionally, I've completed several certification courses in Java, Python, and IoT to further deepen my expertise
